Professional Summary

A dedicated ICT graduate from Mahidol University with a strong foundation in full-stack development and data analytics. I possess proven experience in extracting actionable insights from large datasets using SQL and Python, complemented by a diverse portfolio of projects ranging from cloud-deployed SPAs to complex mobile app prototypes. With a robust command of modern frameworks like React and Flutter, alongside advanced AI literacy, equipped to build scalable, community-focused digital solutions.

Education

Mahidol University

Bachelor of Science, Information and Communication Technology. GPA: 2.76
Thesis: Time Bank System

Salaya, TH
2025

Assumption College

Mathematics-Science Major. GPA: 2.99

Bangrak, TH
2021

Experience

GISTDA

Data Analyst Internship

Chaeng Watthana, TH
June 2024 - July 2024

- Analyzed large datasets on Hot Spot Areas in Thailand using SQL and Python.
- Extracted actionable insights to support strategic decision-making and visualization.

Projects

Personal Planner

- Built a modular productivity OS using Next.js, React, and TypeScript.
- Delivered a command palette, Kanban boards, and habit heatmaps.

Agent Second Brain

- Built an autonomous AI multi-agent orchestration suite using MCP and TypeScript.
- Engineered a GitHub issue solver with self-branching, PR creation, and AI QA gates.

Task Management

- Built a full-stack task management app using Next.js, Supabase, and PostgreSQL.
- Implemented secure authentication and real-time state management across the stack.

Stock Search Engine

- Built a stock search engine prototype using Python, Elasticsearch, Kibana, HTML, and CSS.
- Enabled efficient analysis of historical stock data based on user-defined date intervals.

Portfolio: personal-website-full-stack.vercel.app

Vinyl Music Disc Website Prototype

- Designed a prototype e-commerce site with user login, admin panel, and registration pages.
- Technologies used: HTML, CSS, JavaScript, MySQL.

Personal Portfolio Website

- Developed a responsive Single Page Application (SPA) using React and Tailwind CSS.
- Architected modular, reusable components to showcase technical projects.
- Deployed via Vercel with a focus on high performance and SEO optimization.

Time Bank System (Web Application) | Senior University Project

- Developed a community-focused web app for skill and service exchanges, with User and Admin interfaces.
- Implemented the frontend using HTML, JavaScript, and Tailwind CSS.
- Integrated with the LINE Official Account platform, designing a Rich Menu for user access.
- Utilized GitHub for version control and source code management.

Post Office System Prototype

- Engineered a Post Office System using Use Case and DFD diagrams.
- Built a mobile app prototype with multi-channel payments and delivery tracking.

Retail Inventory Database Design

- Modeled a retail database using comprehensive conceptual and logical schemas.
- Developed SQL scripts for complex transaction handling and data management.
- Improved query efficiency via indexing and execution plan analysis.

Brazilian E-Commerce Microsoft Power BI Research

- Analyzes Brazilian e-commerce trends using Olist's 100,000-order public dataset.
- Evaluates 173.31M in payments, identifying credit cards as the top-value method.
- Improves marketing ROI and logistics by targeting delivery delays and behavior.

Nutrition Calories Tracking Software Application

- The app helps elders manage dietary health via personalized meal plans and calorie tracking.
- Built with Flutter, it features trackers for water and calorie intake alongside progress charts.
- Key functions include recipe recommendations, automated list generation, and social community building.

Skills & Interests

Technical Skills

- Data Analysis & Visualization: Tableau, Microsoft Power BI, Matplotlib, Excel, MATLAB
- Databases & Query Optimization: SQL, NoSQL, PostgreSQL
- Backend Development & Scripting: Node.js, Express, Python, Supabase, Neon
- Web Development: HTML, CSS, JavaScript, React, Next.js, Leaflet.js, Bun
- Software Development: Flutter, Dart, React Native
- Project Management & Tools: Jira, GitHub, Vercel
- Other Tools: TypeScript, Prisma ORM, Tailwind CSS, NextAuth.js, Playwright, Jest, Axe-core, MCP, GitHub Actions, Obsidian

AI Literacy

- Gemini, Claude, ChatGPT, Google AI Studio, NotebookLM, Cursor, Copilot
- Proficient with: Claude Code CLI, Antigravity CLI

Language

- **Native:** Thai
- **Intermediate:** English
- **Elementary:** Japanese

Certifications

- Create Roblox Game
- Python Fundamentals (Coddy, Jun 2026)
- Claude Platform 101 (Anthropic Education, Jun 2026)
- Claude Code 101 (Anthropic Education, Jun 2026)
- Claude Code in Action (Anthropic Education, Jun 2026)
- AI Agent for ALL (Taweesak Samanchuen, Jun 2026)
- AI Agents in Action (Taweesak Samanchuen, Sep 2026)

Interest

- Sports, Chess, Finance
